

# NATHAN WALTER

(847) · 849 · 7896 ◊ [walter9@illinois.edu](mailto:walter9@illinois.edu)

Current Address: 120 Talbot Laboratory, 104 S. Wright St. ◊ Urbana, Illinois 61801

Permanent Address: 2320 Thayer St. ◊ Evanston, Illinois 60201

## EDUCATION

---

**University of Illinois at Champaign-Urbana (UIUC)** August, 2013 – present  
*Master of Science* in Nuclear, Plasma, and Radiological Engineering (NPRE)  
*PhD Candidate* in Nuclear, Plasma, and Radiological Engineering (NPRE)  
Computational Science and Engineering Certificate  
Expected Master's Degree Completion: August, 2015  
Expected PhD Completion: May, 2018

Advisor: Yang Zhang

**University of Illinois at Champaign-Urbana (UIUC)** August, 2010 – January, 2014  
*Bachelor of Science* in Nuclear, Plasma, and Radiological Engineering (NPRE)  
Minor in Mathematics  
Overall GPA: 3.84/4.00

## RESEARCH INTERESTS

---

Understanding slow material processes from a atomistic scale; Neutron and X-ray scattering; Classical and Ab Initio molecular dynamics for modeling and simulation; Materials undergoing irradiation; Large deformation constitutive material equations.

## APPOINTMENTS

---

**Research Assistant** Yang Zhang's Research Group January, 2014 – present  
**Nuclear Regulatory Commission Graduate Fellowship** January 2014 – present  
**Teaching Assistant** August, 2013 – January, 2014  
NPRE 448: Nuclear Systems Engineering and Design

## RESEARCH EXPERIENCE

---

**Master's Degree Research** January 2014 – present

- Implemented a method of directly sampling the energy landscape into GROMACS in order to study the activation barrier statistics of various systems
- Developed reduction codes to extract quantities from classical and ab initio molecular dynamics simulations relevant for comparing simulations to scattering experiments (i.e. intermediate scattering function, density of states, etc.)
- Performed ab initio molecular dynamic simulations to study the vibrational modes in D<sub>2</sub>O and compare to neutron scattering experiments conducted at SEQUOIA, SNS, ORNL.
- Performed ab initio molecular dynamic simulations to study the effects of hydrogen impurities on liquid lithium transport properties

---

## Neutron and X-ray Scattering Summer School

June 2015

- Studied x-ray scattering methods at the Advanced Photon Source, APS, Argonne National Laboratory (ANL)
- Studied neutron scattering methods at SNS and HFIR, Oak Ridge National Laboratory (ORNL)

---

## Scattering Experiments

May 2014

- Participated on Inelastic Neutron Scattering experiments on liquid metals performed at CNCS, SNS, Oak Ridge National Laboratory (ORNL)
- Analyzed scattering data on D<sub>2</sub>O performed at SEQUOIA, SNS, Oak Ridge National Laboratory (ORNL)

---

## Los Alamos Computational Physics Student Summer Workshop

Summer 2014

- Implemented a strain-based constituent equation for large material deformation under high strain-rates into a production hydrocode
- Developed concepts for extending the strain-based formulation from perfectly plastic materials to rate-hardening materials.
- Studied the advantages of the strain-based with pertaining to advection in Lagrangian mode, finite material rotations, and artificial viscosity.

---

## Institute for Genomic Biology

Summer 2012

Undergraduate Research Assistant to Biofuel Lab Research

Champaign, IL

- Worked on British Petroleum (BP) Biofuel Project
- Analyzed soil samples for carbon/nitrogen make-up
- Studied different plants' potential as a biofuel

---

## University of Northeastern Illinois

Summer 2009

Student Research Assistant on Abstract Topology Project

Chicago, IL

- Implemented Java code to simulate contact points
- Developed mathematical and programming algorithms for the project

---

## TECHNICAL STRENGTHS

### Computer Programming Languages

C, C++, Matlab, Python, Fortran, Java, L<sup>A</sup>T<sub>E</sub>X, Swift, AJAX

### Software

GROMACS, LAMMPS, VASP, SRIM/TRIM, FLAG, VMD, IGOR Pro, Dave, gnuplot, Adobe Photoshop, Illustrator, Flash, SPSS

---

## PUBLICATIONS

**Nathan Walter**, Paul Friedrichsen, Scott Runnels, “*Extending a Strain Space Formulation for Plasticity to Rate-Hardening Materials and Finite Rotations*”, submitted to Mathematics and Computers

in Simulation .

**Nathan Walter**, Paul Friedrichsen, Scott Runnels, “*Extending a Strain Space Formulation for Plasticity to Rate-Hardening Materials and Finite Rotations*”, LA-UR-15-23329, Los Alamos Unlimited Release (2015).

Zhikun Cai, **Nathan Walter**, Yang Zhang, “*Energy Landscape Statistics And Coarsening In Liquids: A Relaxation Mode Analysis*”, to be submitted.

**Nathan Walter**, Paul Friedrichsen, “*Improving Plasticity Modeling in Hydrocodes with Hypoelastic Frameworks*”, LA-UR-14-26946, Los Alamos Unlimited Release (2014).

## PRESENTATIONS

---

Poster, American Physical Society March Meeting, “*Energy Landscape Statistics of Kob-Andersen Liquid From Direct Energy Barrier Sampling*”  
March, 2015

Contributed Talk, Los Alamos Student Summer Symposium, “*A New Strain-Based Method for Plastic Flow Simulations*”  
August, 2014

## AWARDS AND HONORS

---

U.S. Department of Energy, Naval Reactors (NR), *Rickover Fellowship Program in Nuclear Engineering*  
Honorable Mention  
April, 2014

Nuclear Regulatory Commission Undergraduate Scholarship  
Fall, 2011 – Spring, 2013

University of Illinois at Champaign-Urbana Dean’s List Recipient  
Spring 2011 – Spring 2013
